

# Batching Pages

- Create the primary page for the batch and save as unpublished.
- Do the same for each secondary page in the batch.
- Go back to the primary page, edit it again to create the menu item for it, and save as unpublished.
- Do the same for each secondary page in the batch.
- Go back to the primary page, edit it again, and change the workflow state to published.
- Do the same for each secondary page in the batch.
