HEALTH EDUCATION

The Oregon Board of Education adopted Health Education Content Standards in February 2005. A team of 4J health educators reviewed the Oregon Health Education Standards document and the Oregon Department of Education grade level-mapping document in health and determined specific grade level and priority ranking within the grade level to provide a comprehensive health education program including health concepts and skills. That information is included in a separate document, *Health Education, Prioritization of Oregon Health Education Standards, Grade Level Curriculum Map (grades K-3, 4-5,6-8, and 9-12)* and includes the essential skills, important skills, and condensed skills that students are to attain. It also includes resources and alignment with the district adopted health curricula. It is available on the 4J Prevention/Wellness web site.

This tool may be helpful to schools as a beginning planning guide in developing their articulated program and includes only the essential skills. This document also identifies the eight basic health skills that students will develop in order to make healthy decisions, identifies the nine major health content areas, concepts to be taught, and examples of skill based activities that may be used to teach the essential concepts. The eight skills that students will develop at each grade level are: Concepts (CC), Accessing Information (AC), Self Management (SM), Analyzing Influences (INF), Interpersonal Communication (IC), Goal Setting (GS), Decision Making (DM), and Advocacy (AV). For some grade levels, resources are listed, aligning the district adopted health curricula with the concept. Resources listed in italics are not district adopted health education curricula. They are suggested as examples of possible supplemental materials that teachers may choose to use in their instructional program. A Health Education Resource Packet, developed for each grade level, is available through the 4J print provider and provides additional resources for the classroom teacher. When schools feel they have developed a program providing the essential skills they will want to continue this process, including important and condensed skills, which are listed in the first referenced document.

HEALTH EDUCATION

Grades 9-12

HEALTH SKILLS—The study of health education prepares students to make healthy decisions and take healthy actions on matters concerning personal, family and community health. Its goal is for students to become health literate (the ability to obtain, interpret, and understand basic health information and services) and to use such information and services in health-enhancing ways.

Common Curriculum Goals—Demonstrate ability to use health skills, to obtain and interpret health information, to manage personal behaviors and to advocate for health and safety issues.

Skills	9	10	11	12
Accessing Information Demonstrate ability to access valid health and safety related information. Identify and access resources at home, at school, and in the community for health and safety information.	E	E	E	E
Self-Management Demonstrate self-management skills necessary to practice health-enhancing behaviors and reduce health risks. Demonstrate management skills to prevent unsafe situations and promote behaviors that enhance health and safety.	E	E	E	E
Analyzing Influences Demonstrate ability to analyze influences of culture, media, technology and other factors on health. Identify influences on health and well being (e.g., culture, family, media, technology, peers, body image, emotions, and physical environment).	E	E	E	E
Interpersonal Communication Demonstrate ability to use interpersonal communication skills (verbal and non-verbal) to enhance health and safety. Use communication skills to help self and others avoid unsafe situations and promote healthy behaviors.	E	E	E	E
Goal Setting Demonstrate ability to use goal-setting skills to enhance health and safety. Use a goal setting model to set goals that enhance health and safety	E	E	E	E
Decision Making Demonstrate ability to use decision-making skills to enhance health and safety. Use a decision making model to make positive health and safety decisions.	E	E	E	E
Advocacy Demonstrate the ability to advocate for personal, family and community health and safety. Advocate for the benefits of safe and healthy actions and environments at home, at school and in the community	E	E	E	E
